Hack4SocialGood2026

THE PROBLEM

124 pages, 180 foundations, thousands of people in need and too many mismatched applications.
Foundations overwhelmed. People left waiting.

Application after
application.
Months of waiting.

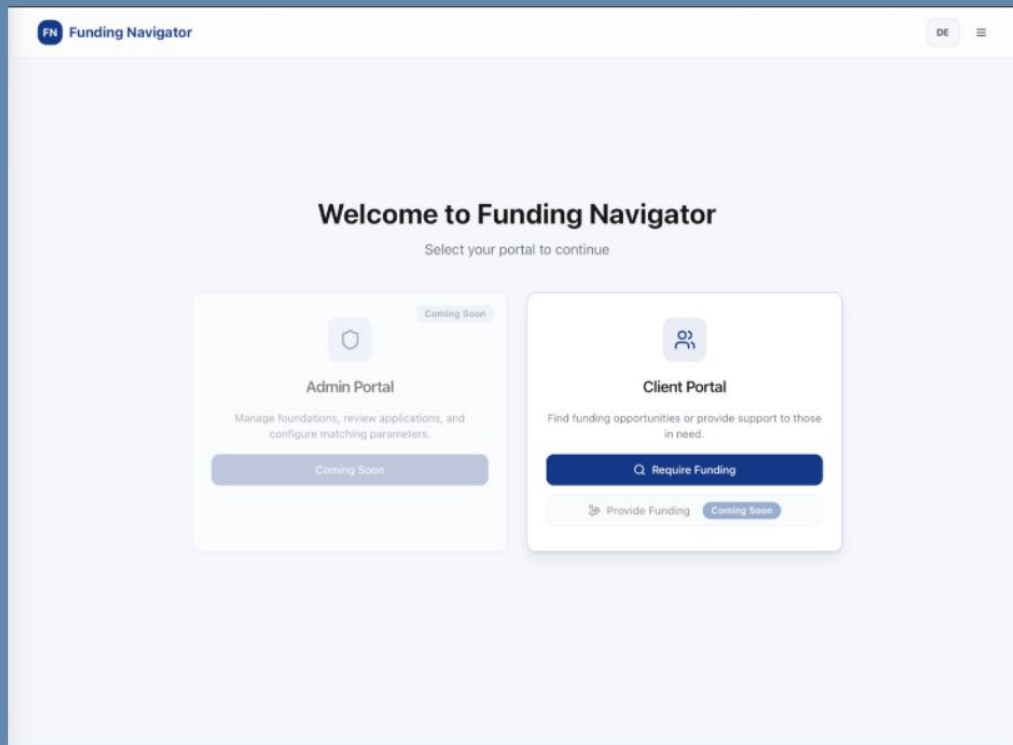

Wrong match.
Wrong target group.

Start over.

We're here to fix the match.

OUR SOLUTION

FundingNavigator matches people to the right funding —fast!

HOW DOES IT WORK?

- Answer a few questions → get tailored funding matches across Switzerland
- Quick, simple, interactive matching for social workers, individuals, and nonprofits
- Ranked results + ready-to-send application letters

The screenshot shows the 'Funding Navigator' interface at Step 2 of 3. A progress bar at the top indicates 87% completion. The main heading is 'What kind of support are you looking for?' with the instruction 'Choose the option that best describes your situation'. There are four selection boxes: 'As a private person' (Individual seeking personal funding), 'As an institution' (On behalf of a private person), 'For project funding' (Funding for a specific project), and 'For education funding' (Support for education costs). Navigation buttons for 'Back' and 'Next' are visible at the bottom.

The screenshot shows the 'Your Funding Matches' page in the 'Funding Navigator' interface. It displays '150 results found'. A yellow warning box states: 'Foundations receive many funding requests. Please complete your application carefully and accurately so foundations are not overwhelmed.' Below this, two funding matches are listed:

- Anna und Paul Bucher-Gossweiler-Stiftung** (100%)
Zweck der Foundation ist es, zugunsten der bäuerlichen Bevölkerung der non-profit zu dienen und deren Bestreben zu fördern und zu unterstützen. In erster Linie sollen landwirtschaftliches...
Priority: **High**
- Fred Tschanz-Stiftung** (100%)
Die Foundation richtet Bar- oder Naturalspenden an bedürftige, geistig und/oder körperlich People

HOW WE BUILT THIS:

Understood the user requirements

Imagined the application from a user's perspective

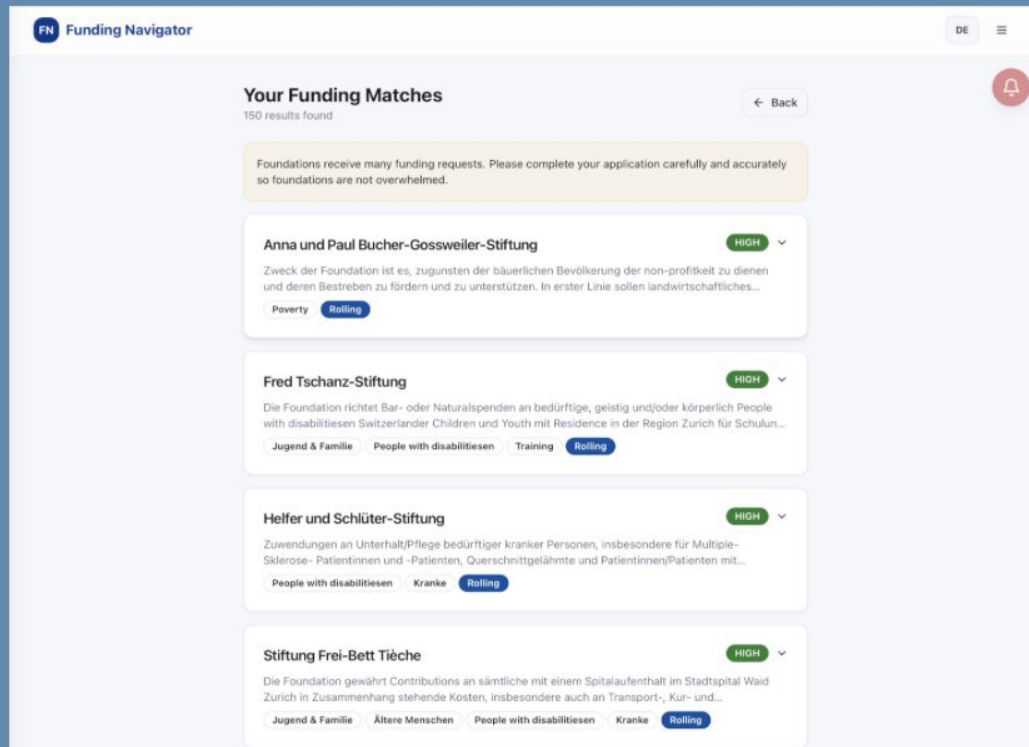

Created a basic UI design

Made the front-end for the application

Created a Database for storing user info

Tested out the UX for checking the functionality

Connected everything using the backend using vector matching for queries of the user
